

General-Purpose Prototyping Board

Prototyping boards with punched holes are convenient, economical tools for assembling circuit components as well as cost-effective alternatives to custom designs.

Features:

- Board Thickness: 0.062"
- Hole Spacing: 0.10"
- Pad size: 0.08"
- PCB Material: Epoxy Glass
- Size (W" x L"): 2.00 x 4.40
- Circuit Pattern: Power/Ground perimeter bus with pad per hole
- Hole Pads: Single-sided
- Number of Holes x Diagonal: 669 x .038"
- Power/Ground Buses: 4
- Number of Mounting Holes x Diagonal: 4 x 0.140"
- Weight: 0.03 lbs. (0.48 oz.)
- Fits Enclosure: [18914](#) and [11965](#)
